Words of Welcome

Dear colleagues,

Against a backdrop of intensifying social, economic, moral, and political tensions and transformations, this year's conference theme, *"Philanthropy by the people, for the people"*, invites timely reflections on the evolving roles, responsibilities, and realities of philanthropy within this shifting landscape. What does it truly mean for philanthropy to be 'by' and 'for' the people?

Central to the conference theme is a persistent conundrum: while philanthropy often acts as a force for public good, stepping in where others falter or fail, it is predominantly shaped by private interests, resources, and values. This duality continues to spark important debates about democratic legitimacy and accountability, particularly regarding participation, equality, and shared decision-making. Yet, philanthropy's independence from state and market logics can also foster long-term, experimental, or controversial efforts, and help safeguard spaces for dissent, pluralism, innovation, and imagination.

Bringing together scholars and practitioners from diverse fields, traditions, and geographies, this year's conference offers a unique space to explore how philanthropy, its people, perspectives, and priorities, both shapes and is shaped by the past, present, and future democratic life.

On behalf of the ERNOP Board, I wish you a meaningful and enriching time in Heidelberg.

Tobias Jung

ERNOP President

Dear colleagues,

Welcome to Heidelberg – a vibrant and diverse city where global companies, long-term residents, and visitors around the world come together.

Heidelberg is home to leading research institutions like the German Cancer Research Center, several Max Planck Institutes, and Germany's oldest university – the Ruperto Carola (founded in 1386), renowned for its academic excellence. With over 30,000 students, 9,000 staff, and 557 professorships, the university excels in teaching and research.

Philanthropy in Germany has deep roots, with religious foundations dating back to the 10th century. The oldest civic foundation, the Bürgerspital Würzburg, was founded in 1316 and still operates today. A major wave of engagement emerged in the 19th century—through foundations, social entrepreneurs, and volunteers who helped shape Germany's modern welfare system.

At Heidelberg University, philanthropy remains important, supporting buildings, grants, and prizes. The Centre for Social Investment (CSI) was founded with foundation support (2006–2013) before becoming part of the university.

As a long-standing ERNOP member, CSI is proud to host the 2025 ERNOP Conference at Heidelberg University.

We wish all participants a safe, interesting, and pleasant stay at Heidelberg.

Keynote by Liv Egholm

(Copenhagen Business School)

Under the theme, “**Philanthropy for the People, by the People? The Roles, Organisations and Motivations of Philanthropy in Contemporary Democracies and Social Structures,**” the keynote will explore the intricate relationships between philanthropy, welfare-state regimes, and governance structures, with a particular focus on its role in addressing societal challenges and transformations.

By examining the evolving roles of philanthropy—both as a complement to and as a challenge for public institutions and the welfare state—the session will highlight its potential to foster social cohesion and transformation. At the same time, it will critically assess the risks of unintended consequences that may exacerbate inequalities. The keynote will integrate theoretical perspectives with practical examples, ensuring relevance for both academic scholars and professionals in the philanthropic and civil society sectors.

With its emphasis on bridging research and practice, the keynote will engage a diverse audience of conference participants from across Europe and beyond. This session will serve as an opportunity to reflect on the future of philanthropy’s contribution to democratic societies and its evolving role in addressing societal challenges.

About Liv Egholm

Liv Egholm is an expert in examining how societies conceptualize, administer, and enact “the common good” and how this notion shapes civil action and organization over time. Her research delves into foundations, philanthropy, gift-giving practices, and civil society organizations, providing key insights into the mechanisms of social inclusion and exclusion that shape these processes. Her work is instrumental in understanding the historical, contemporary, and future dynamics of societal organization and action.

Currently, Liv is leading two major research projects:

- **Civic Governance and Leading of Alliances** – This project investigates collaborative practices within emerging cross-sectoral alliances, analyzing their impact on internal cooperation and their ability to address societal challenges effectively.
- **The Role of Civil Society Organizations and Social Movements** – This project examines how civil society organizations and social movements engage with specific issues and societal problems, emphasizing their influence on collective action and problem resolution.

Liv’s research significantly contributes to both academic discourse and practical applications in civil society, philanthropy, and the broader concept of “the common good.” Her theoretical and methodological approach is rooted in a relational-processual perspective, drawing inspiration from cultural sociology, pragmatism, and historical analysis. Through this lens, she offers a nuanced understanding of the complexities surrounding civil action and societal governance.

Keynote by Daniela Schwarzer (Bertelsmann Foundation)

Strengthening Democracy and Social Cohesion: Philanthropy's Role in a Changing Europe

In the context of growing polarization, geopolitical uncertainty, and transformation pressures on societies worldwide, Daniela Schwarzer, Member of the Executive Board of the Bertelsmann Stiftung, reflects on the role of philanthropy in safeguarding and renewing democratic institutions and social cohesion across Europe.

Drawing on her deep expertise in European governance, transatlantic relations, and democratic resilience, Schwarzer examines the strategic role of foundations in supporting evidence-based policymaking, enabling inclusive civic participation, and (re-)establishing trust in democratic processes.

Her keynote will not only highlight philanthropy's potential to act as a connector across sectors and a driver of democratic innovation but will also address critical shortcomings and pitfalls—such as issues of legitimacy, and (unintended) political influence. Through concrete examples from both Germany and the wider European context, Schwarzer presents a nuanced picture of how philanthropic actors can strengthen societies' capacity to manage political, social and economic transformation.

About Daniela Schwarzer

Daniela Schwarzer is one of Europe's foremost experts on democracy, European integration, and geopolitical strategy. She currently serves as **Executive Vice President at the Bertelsmann Stiftung**, focusing on strengthening Europe's democratic resilience in a rapidly changing global landscape. With a distinguished career spanning think tanks, academia, and policy advising—including leadership roles at the **German Council on Foreign Relations (DGAP)** and the **Open Society Foundations**—her insights will provide a deep and strategic perspective on philanthropy's role in democracy at the local, national, and European levels.

About the European Research Network on Philanthropy (ERNOP)

The **European Research Network on Philanthropy (ERNOP)** is the leading network for philanthropy research in Europe. Founded in 2008, ERNOP brings together **over 250 researchers from 25 countries**, all dedicated to advancing knowledge about philanthropy's role in society. Our members explore a wide range of topics, from donor behavior and nonprofit governance to social innovation and impact measurement.

At ERNOP, we believe that **strong connections between research and practice** are essential for the future of philanthropy. That's why we don't just study philanthropy—we actively engage with practitioners, policymakers, and funders to ensure that research findings contribute to real-world solutions. Through collaborations with key European organizations such as **Philea, Impact Europe, EFA, and CEV**, we bring academic insights into the heart of philanthropy's decision-making spaces.

Our **biennial ERNOP conference** is Europe's leading academic gathering on philanthropy research, providing a space where scholars and professionals can exchange ideas, debate trends, and build new collaborations. Beyond the conference, ERNOP fosters knowledge-sharing through the ERNOP Science and Society Series and ERNOP Research Notes, ensuring that research remains accessible and relevant to those working in the field.

By participating in **Safe Spaces for Philanthropy**, you are joining an important dialogue that connects academic expertise with the realities of philanthropic work. The discussions here are not just conversations—they are shaping the future of philanthropy, influencing policy, and driving change. ERNOP invites you to be part of this exchange, where research and practice come together to build a stronger, more impactful philanthropic sector.

More information about ERNOP and the work of its members can be found at www.ernop.eu.
